EVENT FACILITIES**

A WARM AND RELIABLE WELCOME IN THE HEART OF **DUBLIN CITY**

The National College of Ireland campus is located in Dublin city centre, at the crossroads of the International Financial Services Centre (IFSC) and Silicon Docklands.

Comprised of two buildings on Mayor Square and Spencer Dock, only a 5-minute scenic walk from each other, the campus has its own Luas stop and is well-connected to cross-Dublin and national public transport, with ample underground car parking at Mayor Square.

There is a vast array of contemporary classrooms, executive suites, lecture theatres, meeting rooms and boardrooms across the campus that can be tailored for individual use, many equipped for 'dual delivery', so you can welcome delegates in-person or online.

These facilities combine with a highly-skilled and warmly welcoming event team to make NCI first choice for local, national, and international organisations looking for the perfect place to hold anything from a 3-hour AGM to a 3-day multi-space conference.

A SPACE FOR EVERY NEED **AND SO MUCH MORE**

Our Mayor Square Building houses the 270-seater Kelly Theatre, with retractable seating that allows it to be re-set on the flat, to round tables or for display space. This opens from our inspiring, naturally-lit, 3-storey atrium that is the perfect spot for launches, receptions, fine-dining or simply networking and coffee at the end of a seminar.

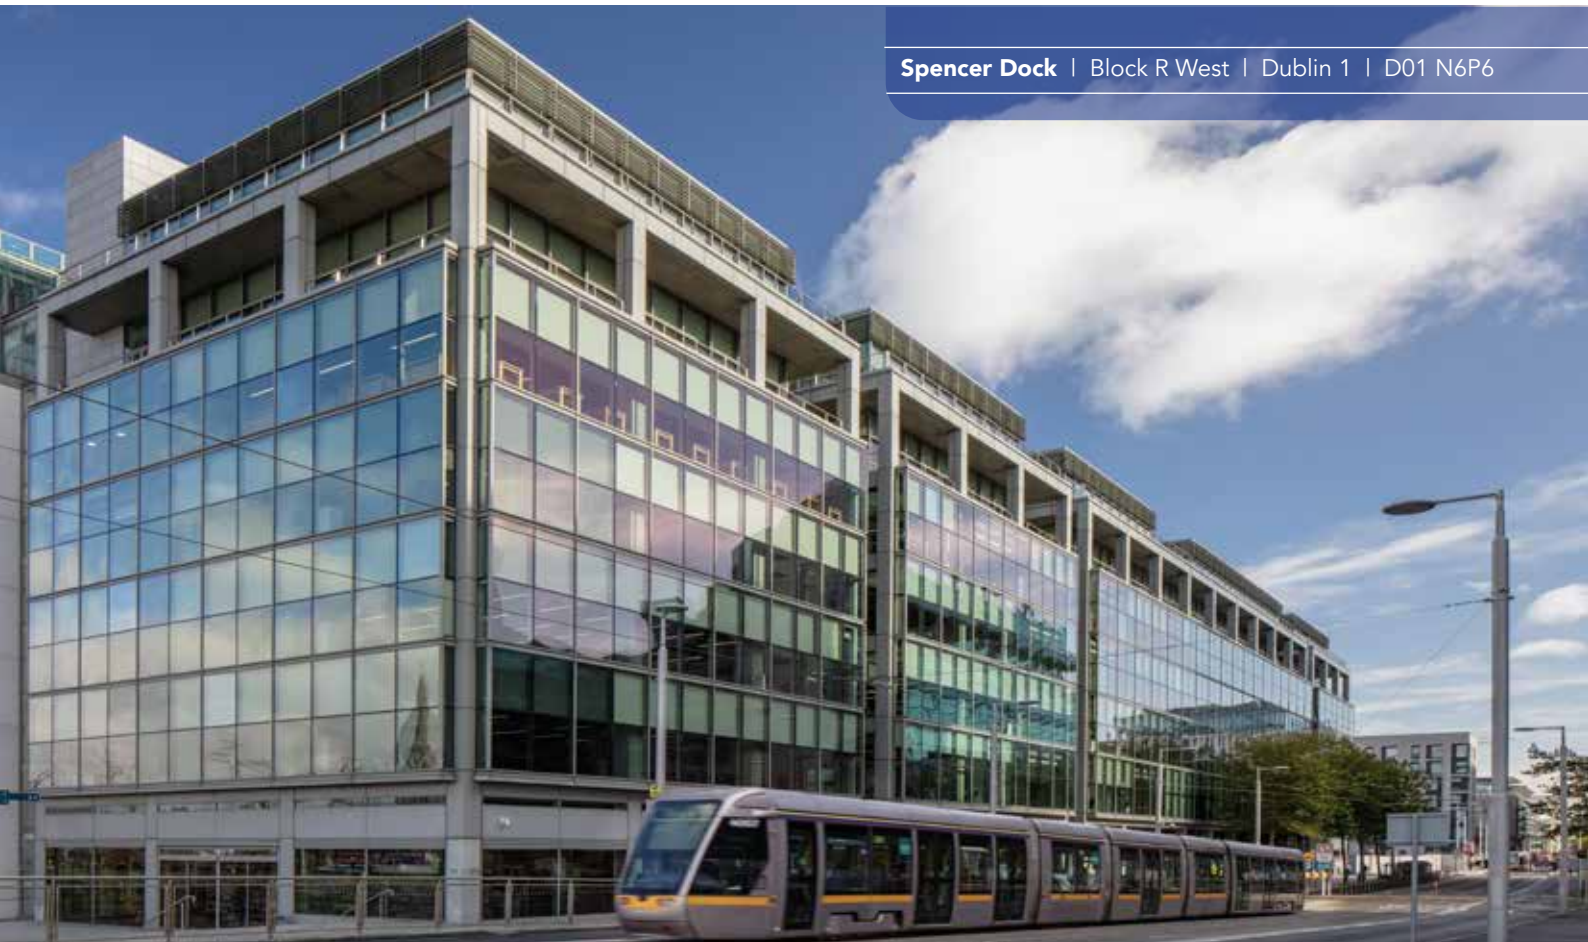

Our Spencer Dock building has been splendidly refurbished to the highest standards. Highlights include an impressive 30-seater boardroom, and a generously proportioned dining area on the sixth floor, with impressive views back across the capital from the Samuel Beckett Bridge to Croke Park and beyond.

All spaces offer complimentary Wi-Fi, that can be personalised to your event. Every boardroom and classroom is fully equipped with audio visual computer equipment. Our cleverly designed spaces prioritise the user, offering unique adjustability to perfectly suit your needs. Additionally, these spaces are built with sustainability in mind, utilising wind-farmed electricity and incorporating energy-saving features.
